

1946

Moving into Motion

Development of the world's first synthetic conveyor belt, establishing a new standard for industrial movement.

1960s

Moving Worldwide

Start of global expansion from Switzerland into more than seventy countries.

1980s

Moving Wider

Introduction of four-meter calendaring, making Habasit the first manufacturer worldwide to produce belts up to four meters wide.

1990s

Moving Modular

Expansion of the portfolio with Plastic Modular Belts, supporting flexible and hygienic conveying solutions.

2000s

Moving in Sync

Introduction of timing belts for precise, synchronized motion in increasingly automated environments.

2020s

Moving with Purpose

Advancement of sustainability initiatives, including the commitment to carbon net zero for Scope 1 and 2 emissions by 2030.

TODAY

Moving Into the Future

Development of smart products that integrate material engineering with digital intelligence for greater precision and performance.

ALWAYS

Moving Together

Strong customer partnerships built over decades, shaping future collaborations through expertise, teamwork, and customer-focused support.

Years in Motion
