

The Comprehensive Spiral Experience

Our project accountability approach provides our clients peace of mind when partnering with Habasit. Our turnkey services and retrofit capabilities, combined with a team of seasoned professionals, ensure a successful start and end to a project, regardless of the scope.

In addition to the service capabilities, we also provide a full range of plastic spiral belting available in various materials and pitch sizes to handle the majority of process applications in today's fast-paced production environments.

If you are considering a retrofit project, service work, or a belt replacement, we welcome the opportunity to discuss your requirements and provide you with a single source solution.

Turnkey solutions – Every step of the way

Our dedicated spiral team provides industry-leading support and will deliver a custom solution specific to your requirements.

1. **Introductory Consultation:**

We begin by evaluating your application, zeroing in on your expectations and desired end results. By collaborating across departments, we ensure every detail is covered.

2. **System and Application Audit:**

We schedule a site visit to thoroughly audit your system, observe spiral operation, and assess sanitation. We'll also gather product details and throughput requirements.

3. **Project Proposal:**

Our spiral engineers will analyze the data and, in collaboration with the project management and sales teams, deliver a comprehensive project proposal.

4. **Project Installation and Follow-Up:**

We manage the entire project, acting as your single point of contact for a smooth process. Once completed, we commission the system and stay onsite for production startup.

Wide range of spiral belting solutions and services

In addition to a full complement of spiral belting, we also provide the following products and services:

Products

- UHMW components – wear strip, cage bar profiles, guides, and rollers
- Drive chain and tooth segments
- Drive components – shaft bearings, cage bearings, motors
- Lubrication systems
- Clean-in-place (CIP) systems

Services

- Custom-tailored maintenance programs
- Optimization audits
- Drive component vibration analysis
- System refurbishment
- Electrical component upgrades (sensors, safety products, panels)
