

Habasit Saniclip

Cleaning Made Easy

Quick belt opening system for HabasitLINK®

Habasit Saniclip is an innovative device for quick belt assembly and easy belt sanitation. It allows simple rod installation and removal in applications where frequent belt sanitation is required. Multiple Habasit Saniclips can be installed in a single belt to allow easy opening at several positions.

- Reduced downtime
- Extracted or installed in seconds
- No tools required
- Skilled personnel not required

Habasit Saniclip makes belt opening and installation for frequent cleaning simpler and more reliable than ever before.

Habasit Saniclip solves the problem of time-consuming belt removal and eliminates the need for extraction tools so operators can stay focused on safe sanitation practices.

The Habasit Saniclip plug can be manually extracted and reinstalled by line operators in a matter of seconds without any tools.

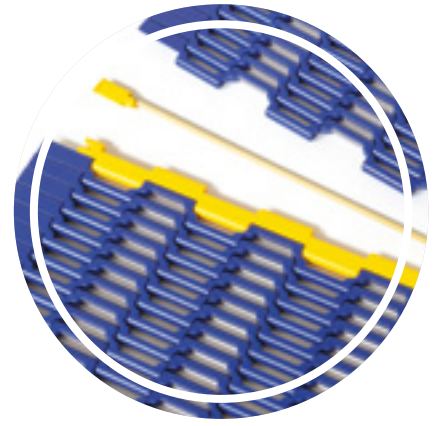

Plug / lever and rod are combined to prevent accidental loss of components.

Quick belt opening

Anything that can enhance the ease of sanitation processes in the food industry is a welcome and valuable improvement. This is where the Habasit Saniclip comes in. It's innovative rod retaining system is designed for easy and quick belt installation. Opening the belt without tool allows that the belt can be taken off the conveyor within seconds. In demanding sanitary environments this is an inimitable advantage of this system.

Experience confirms that at least 20 minutes are required for the maintenance staff to normally arrange for proper tooling and to open a standard belt. Habasit Saniclip is robust and designed for easy manual extraction even in wet and fatty environments. Line operators will be able, without tooling, to easily and quickly open the belt.

Extracted and reinstalled directly by line operators

Adjustable in few seconds without tools by untrained personnel

Robust design

Easy manual extraction

Provided with non-slip surface plug or external clip lever

Easy open / closure of belt in wet and fatty environment

Plug / lever and rod are interconnected as a single assembly

Prevents the accidental loss of plug / lever component

Multiple Saniclips can be installed along the belt length and at both edges

Allows easy opening at several locations

Available for a wide range of HabasitLINK Modular Belts

Suitable for light, medium and high-load applications in food industry

Available in POM yellow and PA blue

Easy identification

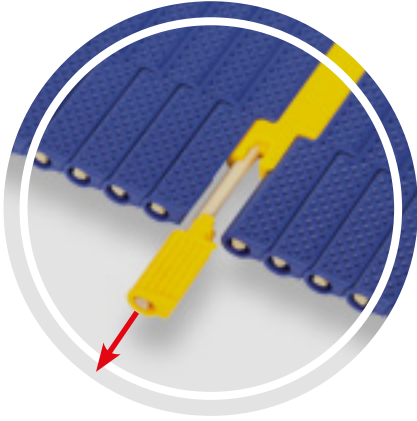

Extracted and reinstalled in seconds

Habasisanclip can be manually extracted and reinstalled directly by line operators in a matter of seconds, without any tools.

Two different opening systems have been developed in order to better fit with the belt pitch.

Plug system:

0.3" – 0.5" pitch

Lever system:

0.5" – 2" pitch

Plug / lever and rod are interconnected as a single assembly to prevent accidental loss of components.

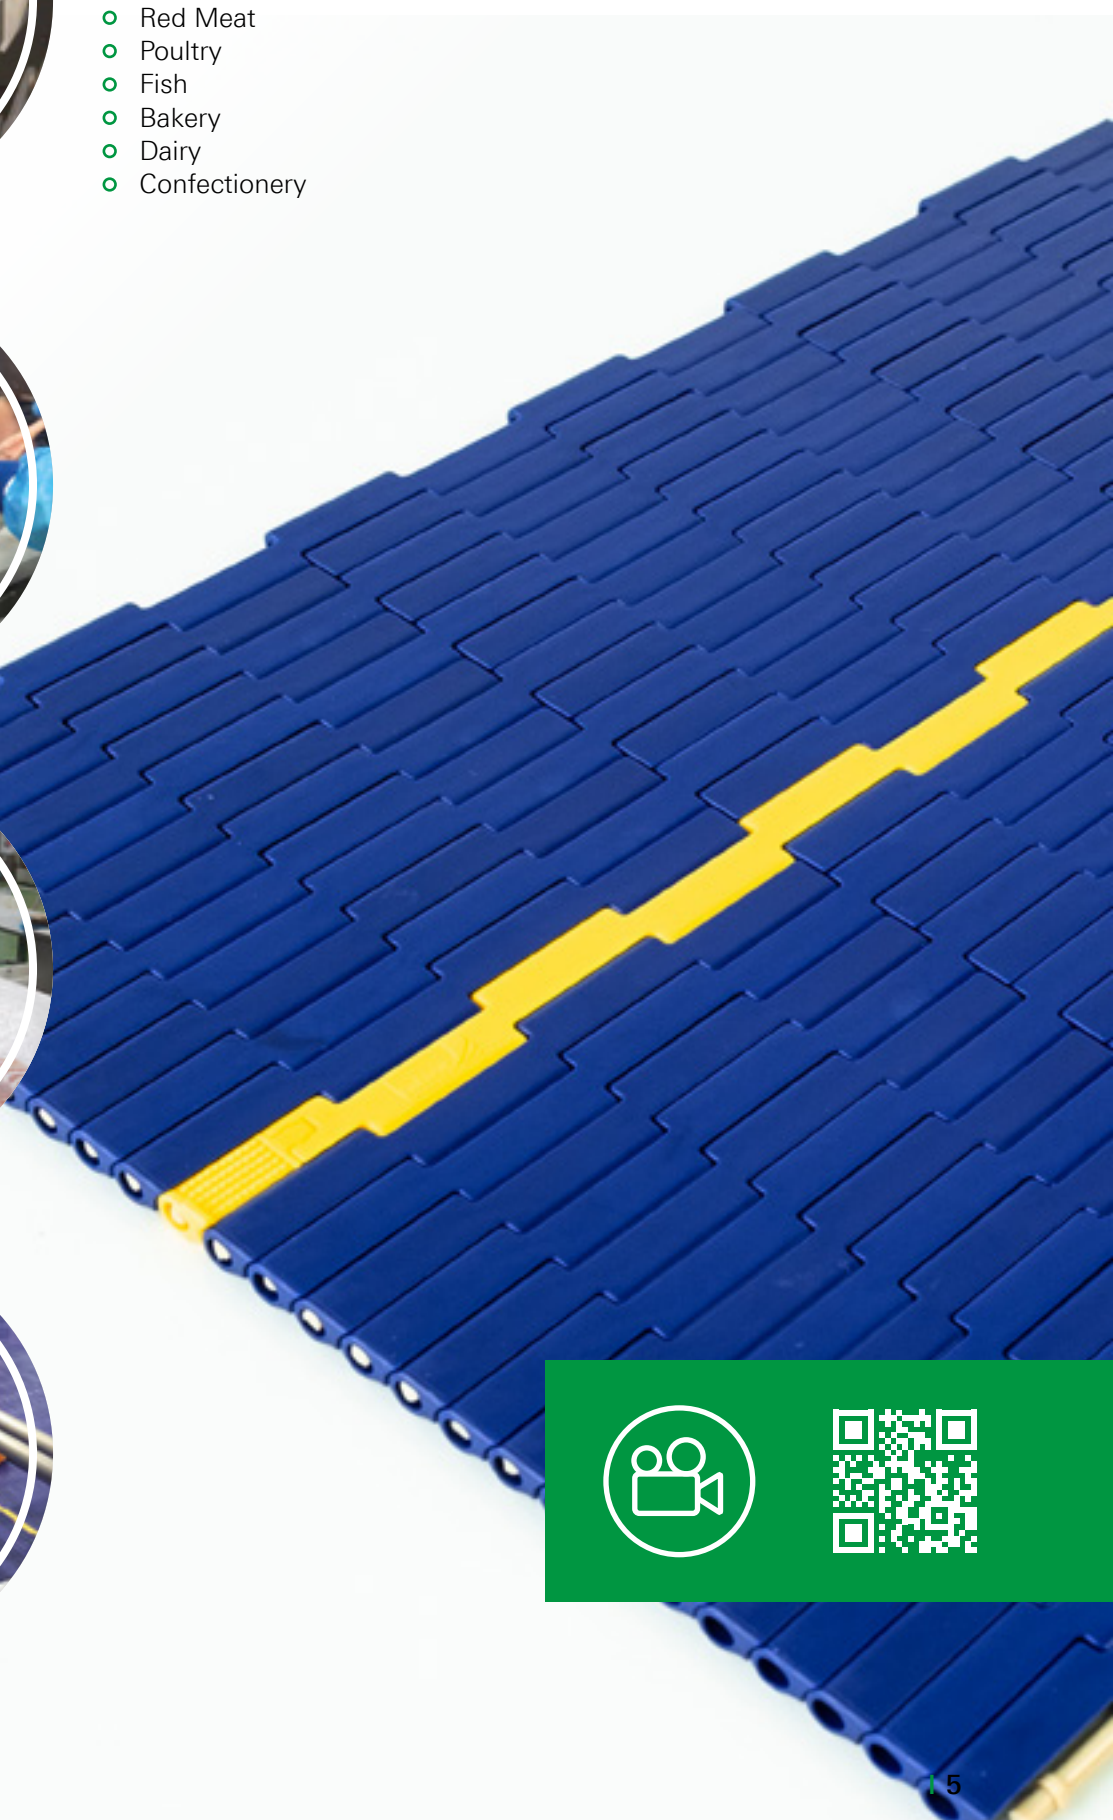

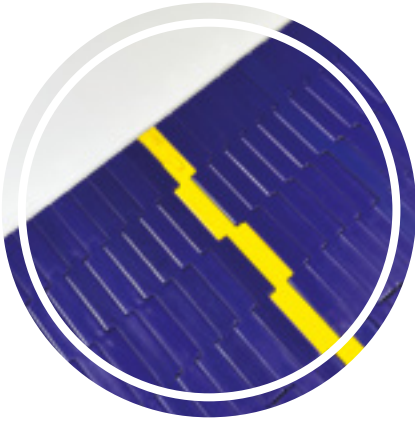

Examples

Habasit Saniclip is usable in any application that requires an enhancement of sanitation processes in the food industry, or requires a quick belt opening for maintenance operations.

- Red Meat
- Poultry
- Fish
- Bakery
- Dairy
- Confectionery
