

Habasit Saniclip

Cleaning Made Easy

Quick belt opening system for HabasitLINK modular belts

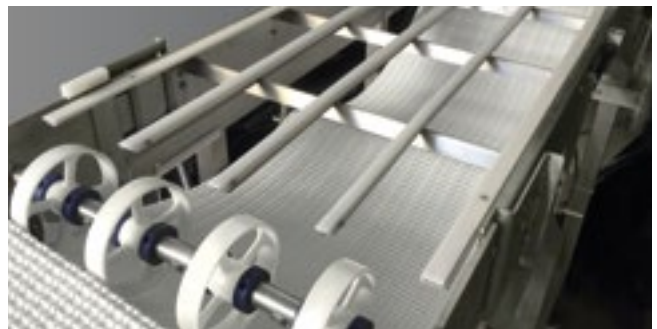

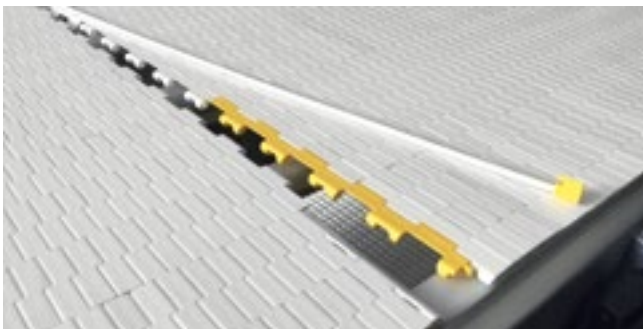

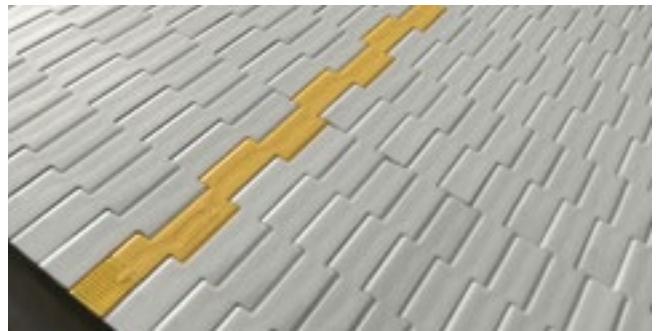

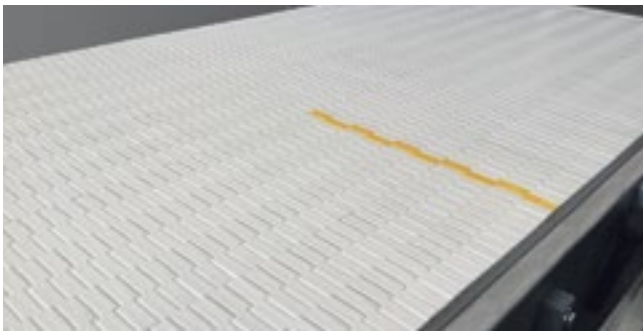

Habasit Saniclip is an innovative device for quick belt assembly and easy belt sanitation.

It allows simple rod installation and removal in applications where frequent belt sanitation is required. Multiple Habasit Saniclips can be installed in a single belt to allow easy opening at several locations.

- Reduced downtime
- Extracted or installed in seconds
- No tools required
- Skilled personnel not required
- Non slip surface for easy removal and installation in wet or fatty environments

Habasit Saniclip – Cleaning Made Easy

- Habasit Saniclip makes belt opening and installation for frequent cleaning simpler and more reliable than ever before.
- Habasit Saniclip solves the problem of time-consuming belt removal and eliminates the need for extraction tools so operators can stay focused on safe sanitation practices.
- The Habasit Saniclip plug can be manually extracted and reinstalled by line operators in a matter of seconds without any tools.
- Plug / lever and rod are combined to prevent accidental loss of components.

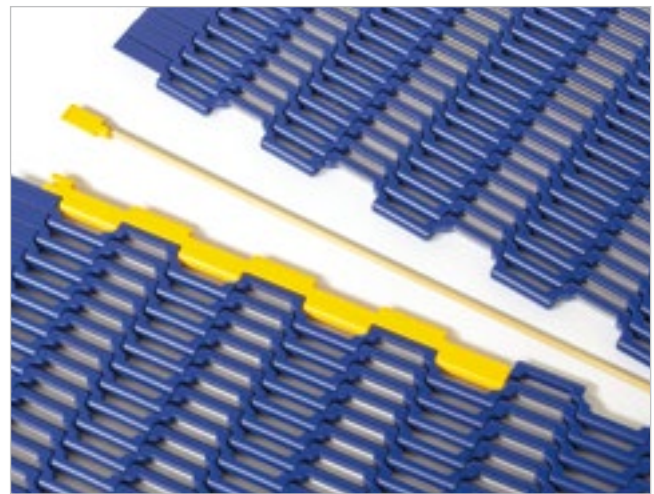

Habasit Saniclip – Cleaning Made Easy

Quick belt opening

Anything that can enhance the ease of sanitation processes in the food industry is a welcome and valuable improvement. This is where the new Habasit Saniclip comes in. Its innovative new rod system is designed for easy and quick rod installation and removal for frequent belt sanitation in demanding sanitary environments.

Saniclip solves the problems of time-consuming belt removal and the requirements for extraction tools that can easily deter operators from safe sanitary practices.

Experience confirms that at least 20 minutes are required for the maintenance staff to normally arrange for proper tooling and to open a standard belt. Habasit Saniclip is robust and designed for easy manual extraction even in wet and fatty environments. Line operators will be able, without tooling, to easily and quickly open the belt.

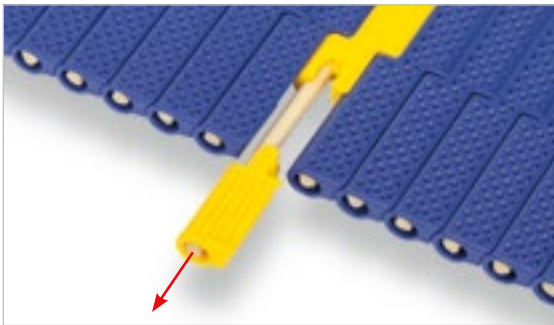

Key features	Your benefits
<ul style="list-style-type: none">• Extracted and reinstalled directly by line operators	<ul style="list-style-type: none">• Adjustable in few seconds without tools by untrained personnel
<ul style="list-style-type: none">• Robust design	<ul style="list-style-type: none">• Easy manual extraction
<ul style="list-style-type: none">• Provided with non-slip surface plug or external clip lever	<ul style="list-style-type: none">• Easy open / closure of belt in wet and fatty environments
<ul style="list-style-type: none">• Plug / lever and rod are interconnected as a single assembly	<ul style="list-style-type: none">• Prevents the accidental loss of plug / lever component
<ul style="list-style-type: none">• Multiple Saniclips can be installed along the belt length and at both edges	<ul style="list-style-type: none">• Allows easy opening at several locations
<ul style="list-style-type: none">• Available for a wide range of Plastic Modular Belts	<ul style="list-style-type: none">• Suitable for light, medium and high-load applications in food industry
<ul style="list-style-type: none">• Available in POM yellow and PA blue	<ul style="list-style-type: none">• Easy identification

Habasit Saniclip – Cleaning Made Easy

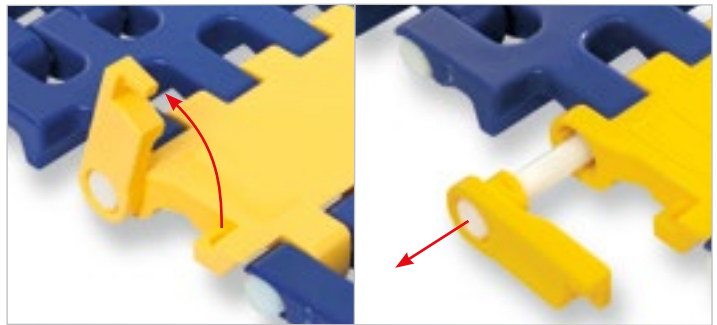

Extracted and reinstalled in seconds

Habasit Saniclip can be manually extracted and reinstalled directly by line operators in a matter of seconds, without any tools.

Two different opening systems have been developed in order to better fit with the belt pitch.

Plug system: 0.3" – 0.5" pitch system

Lever system: 1" – 2" pitch system

Plug / lever and rod are interconnected as a single assembly to prevent accidental loss of components.
