

Habasit® Cleandrive Saniclip Plug System for 2" Mechanical Lace

Habasit® Cleandrive aramid reinforced monolithic TPU conveyor belts have been recognized for their safe and hygienic food processing performance for many years.

Habasit® Cleandrive is a premium food safe product line that supports a wide range of applications and offers a selection of joining methods to choose from.

For easier and faster belt disassembly, Habasit's smart Saniclip plug system compliments our closed-hinge mechanical lace joining method to reduce maintenance costs and improve hygiene and reliability.

It's vital to keep belt joints clean and contaminant-free in food processing applications. Habasit Saniclip joints allow quick belt removal instead of cleaning in place and also simplifies belt replacements reducing downtime and eliminating the need for a press and/or installer.

The mechanical lace system is available in both white and blue in 634 mm (25.96") width for use with either stainless steel or POM (polyoxymethylene) rods.

- Easy removal and reassembly
- Encourages belt removal for cleaning
- Reduces downtime and cost
- Tool free design
